

Mississippi EMS Education

September 24, 2003

This schedule will be updated as more courses are registered with our office. We are asking all training sites to notify us of upcoming events and courses so we can post them on this calendar.

The refresher programs in Mississippi are now made up of eight-hour Blocks. This change has been made in an effort to make education easier to obtain for the providers in the State. **The Blocks may be taken in any order from any combination of training sites.** All Blocks must be completed during the two-year recertification period.

The course sponsors are requiring pre-registration for the Blocks. **Textbooks may be required.** Check with the instructors for details.

The course objectives for the Refresher Blocks are available on our website at www.msems.org.

Basic Refresher Block Curriculum

The refresher is made up of three 8-hour blocks for a total of 24 hours. Basic EMT's will also need an additional 48 hours of continuing education to meet National Registry requirements for re-certification.

The blocks are:

- B1. Preparatory / Trauma
- B2. Patient Assessment / Medical Emergencies
- B3. Airway / OB / Pediatrics / Current Trends

Intermediate-85 Refresher

The Intermediate-85 refresher is comprised of the 24 hour Basic Refresher **and** a 12-hour Intermediate-85 refresher Blocks for a total of 36 hours. This is the only 12-hour unit in the Mississippi series. The Intermediate-85 refresher block will be available from ALS training sites. Intermediate-85's will also need an additional 36 hours of continuing education to meet National Registry requirements for re-certification.

Paramedic Refresher Block Curriculum

The Paramedic refresher is made up of six 8-hour blocks for a total of 48 hours. Paramedic will need an additional 24 hours of continuing education to meet National Registry requirements.

The blocks are:

- P1. Airway/Ventilation
- P2. Cardiovascular
- P3. Medical
- P4. Trauma
- P5. Pediatrics
- P6. Operations and Updates

Paramedic Transitional Course

The Paramedic Transitional Course series has been completed for most of the pre-1999 paramedics in the state. This course consists of six modules and totals 72 hours. It is required for all Mississippi paramedics that were trained prior to the 1999 curriculum changes. Pre-1999 paramedics requesting reciprocity from other states will need to complete this course prior to obtaining certification in Mississippi. In the program's initial release, it was required that that Module I be taken first, followed by Modules II thru VI in any order. Because this course will now only be offered on a limited basis by training sites, this requirement will be discontinued and the Modules may be taken in any order.

Additionally, paramedics trained outside of Mississippi, requesting reciprocity, will be required to successfully complete the **Mississippi Thrombolytic and Nitroglycerin Transport** course prior to certification. (This content will soon be included in the Transitional Course.)

Please contact our office if we can help you in any way.
